

Onyx Contract Services new sponsor of Lanarkshire Badminton Group

By Lanarkshire Badminton

We are delighted to announce ONYX Contract Services a division of ONYX Project Services Ltd as one of our new sponsors.

Established over 20 years ago, they have wealth of experience and a broad network of resources, support, and expertise. Their multi-faceted team comprises professionals with diverse backgrounds in construction, shop fitting, merchandising, and retail, enabling them to deliver top-notch services across various domains.

With a widespread network of remote team members across the country, they ensure true nationwide coverage and a local service experience for clients, no matter their location.

Today, Onyx is led by Michael Brace and Katie Blunt, and offer their clients and construction partners a Turnkey approach to store fit-outs.

Offering a full turnkey solution, their services include Pre-Construction (planning, surveying, CAD) Procurement (technical advice, equipment procurement, value engineering), Installation (on-site expertise and co-ordination with other trade teams) and Project Management (a professional and comprehensive approach). They have extensive experience of working in challenging 'live' trading environments in a range of retail sectors including supermarkets, food-related, hardware, fashion and pharmaceutical.

They gained ISO 9001 accreditation in 2007 and will see from their range of Services the wide spectrum of project expertise they bring from pre-construction to completion.

We are excited and grateful to have their support which is crucial in allowing us to continue develop badminton and communities across Lanarkshire.

They have already purchased new pop-up banners stands for us which we showcased at our Junior League event in January. This helps us to enhance our credibility and profile as an organisation and we are really pleased with the products we have received from Onyx Contract Services – so once again thank you!
